## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-3, 5-12, 14-17, 19 and 20

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Yu (6,475,890) in view of Chiu et al. (2004/0113171).

Regarding Claim 21, Yu discloses a fabrication of a field effect transistor with an upside down T-shaped semiconductor pillar/fin in SOI technology where in Fig. 13, Fig. 15 and Fig. 17, it is discloses an upside-down/reverse T-shaped fin/pillar 340, source/drain regions 362 and 364, dielectric layer 350 formed over the reverse T-shaped pillar, gate 360 formed over the dielectric layer. Yu fails to disclose the required TiN conductive gate layer. However, Chiu et al. disclose a method of fabricating a MOSFET device with metal containing gate structures where in Fig. 6, TiN 16a layer is adjacent to dielectric layer 13.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required TiN conductive gate layer in Yu as taught by Chiu et al. in order to have a FinFET structure with higher performance.
